TOP TIPS
FROM OUR MOST SUCCESSFUL EMPLOYEES!

These are all things you can do too!

Biggest Tip

Employers are not necessarily looking for skills, they are looking for *a great attitude!*

1. Reread your start sheet and be prepared with everything you need to get started - including safety equipment!
2. Be there early on your first day! Do a drive by before your start date so you know exactly where you need to go and which door to use!
3. Show up every day, on time, and ready to work - and don't use your cell phone! (Have backup plans for transportation and child care.)
4. Give plenty of notice if you do need to take any time off of work for appointments (no last minute call offs).
5. Help out where you are needed, even if it's "not your job" (be a team player).
6. Work hard to get along with your co-workers (no drama!).
7. Call Advance if you are having any issues - most issues can be worked out, you just need to communicate with your Advance Representative.
8. Be open to learning and improving (take direction from your supervisors, know that you have a lot to learn).
9. Think long term - work to get hired in to earn raises and promotions, benefits, and vacation time.
10. Be flexible! Sometimes overtime is necessary and you'll thank yourself on payday!
